

TERRY FOX RUN LONDON

For The Institute of Cancer Research

SUNDAY, SEPTEMBER 15, 2024

Battersea Park

Registration 08:30 to 10:00

Start 10:00, Ends 13:00

**With special guest, Fred Fox,
brother of Terry Fox.**

WHO WAS TERRY?

In 1977, 18-year-old Canadian Terry Fox was diagnosed with bone cancer, and his right leg was amputated in order to treat the cancer. Terry ran his Marathon of Hope in 1980 - a cross-Canada run on one good leg and one artificial leg to raise money for cancer research. After running an average of a marathon a day for 143 days in a row, totalling 3,339 miles, Terry ended his run because his cancer had returned. But his courage, determination, and compassion began a worldwide movement to eradicate cancer. Terry Fox passed away in 1981, and now millions of people in over 30 countries participate in his name to raise funds for cancer research.

2.5 / 5 / 7.5 / 10 km Fun Run!
Register to run, ride, or walk
